Hot Tip #29: Be Prepared for the Next Catastrophe!

*IP PBX Clients - forward calls with *94*

Do you have a contingency plan for when the BIG ONE strikes?

We are all aware of the natural disasters that have recently occurred, not only around the country, but also around the world. Are you ready for when such a catastrophe, hopefully of a lower magnitude, strikes where your business is located? Do you have what it takes to ensure communications remain open and business losses are minimized?

If you are an ITS Hosted IP PBX user, you're in good hands - pressing three buttons on your phone today will forward your business calls to a number of your choice in the event of a future outage. This will surely alleviate down time and confusion faced in the wake of a natural disaster. If and when the internet goes down, and you have configured your contingency plan with *94, your calls will be routed to the number specified. You can route calls to another locations' landline or to your cell phone to keep your business running smoothly. In the case of an emergency where land lines go down, it is likely that cellular service will come back up faster, ensuring you too are "back in business".

Configuring the contingency plan is as simple as pressing *94 and then entering the number you wish to forward your calls to.

This business continuity capability only works if you set it up in advance - so put your contingency plan together and press *94 today!

If you are not currently an ITS Hosted IP PBX customer but would like to use to *94 as a contingency plan for your business - switch to IP today and experience these additional benefits:

- Extension Dialing and Call Transfer
- Voice Messaging
- Call Groups
- Find Me/Follow Me Feature
- And many more...

With no real capital investment, your business could have a productive, fully featured phone system up and running within a few days. The ITS Hosted IP PBX allows your business to take advantage of such a system which was previously only available to the largest of businesses and at a greater cost.

To learn more about what we have available for your business, please contact us at 800.876.4ITS (4487) or visit www.itstelecom.com for more information.

Sincerely,

ITS -- Integrated Telemangement Services, Inc.

Lisa Atwood
